BERGER

made to cut. 1919

Our values on the way to 100 years of success ...

>> Brand <<

Behind the BERGER brand are people with ideas and passion for high quality tools.

In close cooperation with professional tool users, we develop innovative products that are always effective in everyday working situations. BERGER is a guarantee for technology that sets benchmarks in ergonomics, cutting power, and durability.

The specialized knowledge of four BERGER generations has been valued in and outside of Germany since 1919. With this expertise, we have also established ourselves as an original equipment manufacturer for large, well-known companies.

BERGER manufactures more than 90 percent of the products in our own company in Wuppertal: Made in Cronenberg.

Made in Cronenberg |  Germany

>> Dependability <<

We value long-term business relationships. Our customers can depend on receiving the best service.

Quick delivery times are a matter of course for us, as are highly profitable POS solutions for various target groups.

>> Quality <<

With our products, quality isn't just a term we throw around – even a family-run company like BERGER must start from scratch every day to achieve quality.

Many test winners demonstrate our high requirements in the development and production of our tools. This is reflected not only in our selection of material, but also in the many useful product details, which speak for themselves.

For example, wear parts are always easy to replace. Comprehensive spare parts supply is a matter of course at BERGER.

>> Complete product range <<

BERGER offers a complete product range of professional tools:

- Hand shears
- Lopping shears
- Hedge shears
- Telescopic poles and attachments
- Handsaws

When developing and manufacturing BERGER products, a high priority for us is long service life.

>> Target groups <<

BERGER develops and produces professional tools for the following industries:

- Garden, landscaping, and municipal maintenance
- Tree maintenance and forestry work
- Construction equipment and materials
- Hardware
- Agriculture, orchard, and vineyard care
- Plant cultivation, sales, and floristry

HAND SHEARS

Sap groove:
Protects the cutting blade
so that it's not sticky

Oil groove:
Enables instant lubrication
by putting oil into the groove
without any dismantling

Intermediate locking mechanism:
Two-step lock position

The angled cutting head reduces strain on the wrist. While cutting, the tool remains pleasantly balanced in a natural, comfortable position. The revolving handle guarantees maximum ergonomics.

HAND SHEARS

Straight cutting head

Customer satisfaction is a priority to us. We have moved from an utilitarian view of designing our tools, to one that guarantees value-creation and easy-of-use.

Many of our tools have an oil groove for dismantle-free lubrication. Users can exchange the blade and counter-blade without needing any special instrument.

HAND SHEARS

Angled cutting head

Our revolving handle shear is a big strain relief. The revolving handle and the angle cutting head balance pressure on wrists. You recognize the difference after working

continuously in the field. Thanks to the intermediate locking position too. It is an added ergonomic feature for more strain-free pruning.

Order no.	Item	EAN-CODE 4006457

HAND SHEARS

Multi-component handle

Order no.	Item	EAN-CODE 4006457			
1766	Pruning hand shear Forged metal body, counter blade with sap groove, wire cutting notch, straight cutting head, ergonomically-designed and composite-material handle for more ergonomics	017666	240 g 8 oz.	20,5 cm 8 in	6

Ease of maintenance

The use of composite material in different parts of the handle leads to a better grip and more user comfort. The oil groove makes it easy to lubricate the tool without dismantling its parts. There is a closed circuit under the oil groove that ensures no dripping of the oil.

Ergonomics

The use of composite material in different parts of the handle leads to a better grip and more user comfort.

Additional benefit

There is a notch for cutting smaller-diameter wires placed on the backside of the forged metal body.

HAND SHEARS

Bypass-system for cutting green wood

Order no.	Item	EAN-CODE 4006457			
1200	Pruning hand shear Forged metal body, chromium-plated counter-blade with deep sap groove, replaceable blade, wire cutting notch, ergonomically-designed handle	012005	280 g 9.9 oz	22,5 cm 8.6 in	6

Order no.	Item	EAN-CODE 4006457			
1320	Hose and cable hand shear Special shear made of high grade steel, ergonomically designed handle with safety lock	013200	150 g 5.3 oz	18,5 cm 7.3 in	6

LOPPING SHEARS

Smooth operation, great performance, and yet additional benefits

The counter-blade has forged branch fixing notches that dig into branches. This feature leads to more precise cutting. Most of the lopping shears come with an oil groove for instant and easy lubrication. The counter-blade has a hot-drop forged sap groove for self-cleaning.

Dedicated to every detail

As from the design, to the manufacturing, to the assembly stage, we go through each one of these with the details in mind. We take considerable engineering measures of our loppers for your best lopping experience. There are different models for different types of wood for different users. The only thing that is constant is quality and cutting precision. Most of our loppers open to an angle of less than 90 degrees for force optimization.

We hot-drop forge and grind the cutting heads for the highest cutting precision. Most of the cutting heads have a non-stick coating for clean cuts. Most of the counter-blades have branch fixing notches as an additional measure of force optimization and cutting precision.

Our loppers are easily serviceable, and most of them come with readily available spare parts.

LOPPING SHEARS

Bypass-system with replaceable cutting head

Order no.	Item	EAN-CODE 4006457			
4260	Lopping shear Forged and replaceable blade and counter-blade, counter-blade with branch fixing notches and sap groove, shock absorber with cushion, high-grade aluminum tube with non-slip and comfortable grip hand guard	042606	1530 g 54 oz	68 cm 27.6 in	3
94008	Blade for no. 4260 and no. 4280	940087	480 g 16.1 oz	32 cm 12.6 in	1
94007	Counter-blade for no. 4260 and no. 4280	940070	455 g 16.1 oz	32 cm 12.6 in	1

Order no.	Item	EAN-CODE 4006457			
4280	Lopping shear Forged and replaceable blade and counter-blade, counter-blade with branch fixing notches and sap groove, shock absorber with cushion, high-grade aluminum tube with non-slip and comfortable grip hand guard	042804	1730 g 61 oz	83 cm 33.1 in	3
94008	Blade for no. 4260 and no. 4280	940087	480 g 16.1 oz	32 cm 12.6 in	1
94007	Counter-blade for no. 4260 and no. 4280	940070	455 g 16.1 oz	32 cm 12.6 in	1

As the blades of bypass pruners glide past one another, they provide a particularly smooth and clean cut. That makes them particularly well suited for cutting green wood. With their thin shearing head, shoots can be cut off right where they sprout.

LOPPING SHEARS

Bypass-system with replaceable cutting head

Order no.	Item	EAN-CODE 4006457			
4210	Lopping shear replaceable blade and counter-blade, drop forged, high-grade aluminum tube with non-slip and comfortable grip hand guard, shock absorbing buffer, total length: 60 cm (23.6 in.); blade length: 9 cm (3.5 in.)	042101	950 g 33.5 oz	60 cm 23.7 in	3

94424	Blade for no. 4170	944245	115 g 4.1 oz	15 cm 5.9 in	1

The profi-logging shears for green wood

For easier maintenance, the blade is easily and quickly replaced — just unscrew the central screw and get the blade replaced. The counter-blade has a sap groove, which does not allow plant residues to sit on the blade. The mounted shock absorbing buffer guarantees a comfortable and strain-free pruning.

Anvil-system with replaceable cutting head

Order no.	Item	EAN-CODE 4006457			
4255	Anvil lopping shear Built-in power transfer mechanism, high-grade steel replaceable cutting head, replaceable counter-blade with a hook	042552	1500 g 52.9 oz	80 cm 31.5 in	3
94453	Blade for no. 4255	944535	172 g 6 oz	17 cm 6.7 in	1
94443	Anvil for no. 4255	944436	120 g 4.2 oz	9,5 cm 3.7 in	1

Cutting head no. 4255

The professional shears for hard and dead wood

The counter-blade with pulling hook clears out intersecting branches

No. 94443:
Anvil for no. 4255

The anti-adhesive coating protects against plant residues and corrosion.

No. 94453:
Blade for no. 4255

Power transfer:

All cutting jobs are made easy due to an inbuilt power transfer. To change the blades, you have to loosen the two nuts, it could not be any easier! All other parts of the cutting head stay tightly screwed together.

LOPPING SHEARS

Anvil-system

Order no.	Item	EAN-CODE 4006457			
4272	Anvil lopping shear For hard dead wood, cutting head made from high-grade steel with anti-adhesive blade, replaceable counter-blade, high-grade aluminium tube with non-slip hand guard	042729	1330 g 47 oz	81 cm 31.9 in	3
94431	Anvil for no. 4272	944313	45 g 1.6 oz	7 cm 2.7 in	1

Anvil shears have better transmission of force, because the blade hits the anvil as it is pulled closed. It is therefore particularly well suited for harder or dead wood and requires less force for cutting.

HEDGE SHEARS

Sap groove prevents blades from sticking

Fine adjustment of blade tension

Sturdy tool of the highest quality

- Self-sharpening blades
- Adjustable blade tension for cutting different hardnesses
- Sturdy connection of cutting head to the beech handles or aluminum tubes with solid metal covering
- Blades are coated to prevent corrosion
- Blades have a sap groove that allows plant residues to flow away from the tool
- Shock absorbers reduce shock to the joints

BERGER

made to cut. 1919

Grass Shears

    					
Order no.	Item	EAN-CODE 4006457			
2100	Grass shear All parts are made of metal, hot-drop forged, chromium-plated, self-sharpening blades, suitable for left and right handed users	021007	355 g 12.5 oz	33 cm 13 in	3

     					
Order no.	Item	EAN-CODE 4006457			
2200	Grass shear All parts are made of metal, anti adhesive coated blades, hot-drop forged, chromium-plated, self-sharpening blades, suitable for left and right handed users	022004	280 g 9.9 oz	30 cm 11.8 in	3

Grass shears in traditional solid quality

All parts are made of metal. Worn parts are easily replaced. With this shear, you will be able to cut a patch of grass or lawn edge where the mower won't reach. It has sap groove to drop off plant residues. Due to the one-hand-thumb lock, the shear is suitable for left and right-hand users.

TOPIARY HEDGE SHEARS

Topiary Shears

ArboRapid

Telescopic poles – click system

ArboRapid is a click system for telescopic poles that permits tool-free changing of attachments. No more bothersome bolts. The telescopic poles have a collapsed length of only 1.75 m (5.7 ft)– so they can be transported without any problem.

Other advantages of the system: The tubes of corrosion-resistant aluminum ensure that the poles remain stable even when fully extended. Saw blades can be replaced independently of the socket. The safety locks can be used to adjust the telescopic pole to any desired height. With the Rocket Master from BERGER, the ArboRapid can even be used as a catapult.

75350 (0,83 - 1,40 m / 2.7 ft to 4.6 ft)

75850 (0,83 - 1,90 m / 2.7 ft to 6 ft)

75300 (1,75 - 3,20 m / 5.7 ft to 10.5 ft)

75800 (1,75 - 4,65 m / 5.7 ft to 15.2 ft)

75900 (1,75 - 5,90 m / 5.7 ft to 19.3 ft)

ArboRapid

Telescopic poles

Please note the different clamp sizes matching the pole diameters. The size designations S, M, and L are engraved on the safety lock.

Telescopic poles - click system

The metal lock is made of high-grade quality steel, additionally coated to withstand corrosion. The locking mechanism can be adjusted at any point with two self-locking metal nuts. This ensures perfect fastening.

SAWS

Fruit saw with sheath/Folding saw for fruit trees with fine teeth (13 teeth per 3 cm / 1,2 in)

The fine teeth of the saw are ideally suited for cutting green wood. The triple-ground, impulse-hardened saw tooth tips work only on the pull stroke and glide through the branch with minimal resistance.

This permits a precise, clean cut, minimizing wound surfaces at the cut to reduce the risk of fungal or bacterial attack.

Furthermore, the offset saw teeth keep the saw from getting stuck during the cutting process.

Sticker

Format: 50 x 23 cm / 19.7 x 9 in; Order no. MARK4004
 Format: 100 x 23 cm / 39.4 x 9 in; Order no. MARK4005

This tool has been tested by the KWF. All tested products have received the test seal of the KWF and DLG. The KWF is a member of the certified and EU-notified German Test Center for Agricultural and Forest Machinery. It certifies that machinery and equipment safety conforms to CE standards. The KWF determines the functionality and performance of tools. Environmental compatibility, safety and health are hereby taken into special consideration.

GS (Checked Security) - an independent test laboratory has confirmed that this product agrees with the legal security requirements. A detailed construction pattern check and a production supervision has been carried out.

Replaceable cutting head: In this tool, the entire cutting head (hook and blade) can be replaced without special tools.

Replaceable hook:
In this tool, the hook can be replaced without special tools.

Replaceable blade:
In this tool, the blade can be replaced without special tools.

This tool is especially suitable for smaller hands.

Angled cutting head:
The angled cutting head reduces strain on the wrist by keeping it in a straight position.

Revolving handle:
The rolling motion across the revolving handle ensures ergonomic working. Even when the same cut is made repeatedly, it stresses the wrist at different places.

The steel blades have been coated for strong protection against corrosion, a guarantee of the durability of your quality tool, for longlasting sharpness and perfect cuts.

Transmission of force

The blade has an anti-adhesive coating, the material is very easy to clean and protected against corrosion.

Wire cutting notch/wire cutter: A small notch makes it possible to cut a wire, without having to use the blade for the purpose.

The shear body is manufactured of forged, high-grade steel.

Terms of business

Sales and Delivery Conditions

All quotations, contracts and deliveries from us are based on our sales and delivery conditions exclusively. Alternative conditions on the part of the Buyer are not binding for us, even if not expressly rejected.

Quotations

Our quotations are without engagement. The catalog forms part of our offers. The illustrations, dimensions and weights in our publications are only approximate, and are subject to change without notice. We reserve the right to modify models and styles.

Special Manufacture

We reserve the right to modify the quantities ordered for special production by plus or minus 10 %, also normal production items, which are marked or finished to Buyer's special requirements. Special orders for non-standard items may not be cancelled following our acceptance of Buyer's order. We are unable to accept the return of such items for credit or allowance.

Order Quantities

Where box quantities are shown, orders should be placed in multiples or quantities. Where variations occur the quantities will be automatically adjusted up or down.

Prices

We reserve the right to dispatch at prices ruling at date of shipment. Prices quoted by us are not binding until confirmed by us in writing. They must be regarded as work prices not including value tax or other changes.

Payment

According to special arrangements, which are stated in our offers and/or invoices. If the agreed credit period has been exceeded, we reserve the right to charge interest payable on the arrears at the rate of 5% above the prevailing bank base rate.

Delivery

Goods are delivered at Buyer's risk. We reserve the right to arrange method of transport, unless otherwise arranged and agreed.

Time of Delivery

All information given in respect of delivery period is approximate and without obligation. We reserve the right to arrange part shipments.

Property Reservation

Until full payment of all obligations on the part of the Buyer resulting from business transactions, the goods remain our property. The Buyer may dispose of the goods in the usual business-like manner. Should the customer sell goods, which are still our property, respective credit is due to our account.

Guarantee

Products undergo rigorous quality controls. Subject to proper use every item carries our guarantee. Any product, which is the subject of a justified complaint, will be replaced free of charge. Any further liability is excluded. Faulty items must be retained for our inspection, and if returned to works sent carriage paid, unless otherwise is agreed.

Return of Goods

Goods correctly supplied to the customer's order cannot be accepted for return or exchange, unless by prior agreement in writing, when a 20 % handling charge will be made. Settling Place and Place of Competency is the place of our company for delivery, payment and competency of justice in case of dispute.
